The best choice for surgical incision closing

Non-invasive Convenient operation Lasts for 14days

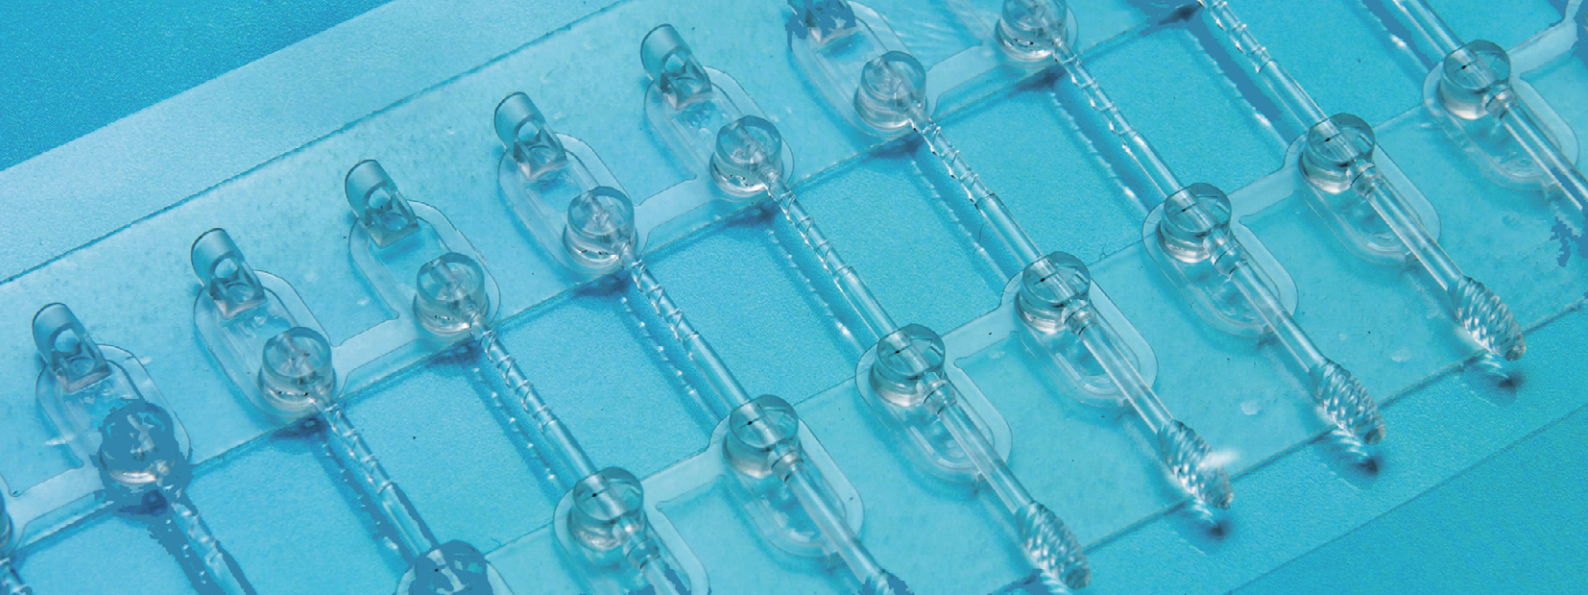

INTRODUCTION

Surgical Incision Closure Set™ subverted the traditional suture method, which is suitable for cuticle closure of surgical wounds on the skin surface, which does not need sutureless or needling. The product does not require removing the stitches after healing. The unique spiral fastening structure allows simple, convenient and reliable operation, to meet the needs of wound closure to a greater extent; It can effectively reduce the generation of hypertrophic scar tissues, to truly achieve the noninvasive effect in appearance.

Zhejiang Haichuang Medical Devices Co., Ltd. (Haichuang) is located in Yuhang Economic and Technological Development Zone in Hangzhou City of Zhejiang Province. It is a medical equipment manufacturer integrating research and development, production and sale, being honored "High-tech Enterprise".

As a science and technology oriented enterprise, Haichuang owns a 100,000-grade purification plant covering an area of 3,000 square meters, specializing in the production of medical supplies and equipment. The products are divided into wound care, medical catheters, hemostatic materials and other series. The representative self-developed products include the surgical incision closure set with exclusive patent, the first painless antibacterial medical catheter in the world, and new hemostatic materials.
